

Wing Pulley

Xin Aneng is a factory specializing in the manufacture of wing pulley in China, which has a history of more than 30 years, and has always focused on making wing pulley. Xin Aneng has independently developed the casting process and modular design technology, so that the wing pulley produced by Xin Aneng is widely used in heavy-duty conveyor systems such as mining machinery and port logistics. There are a lot of regular customers who keep coming back to our Wing Pulley. Our production line has been certified by major testing institutions, and we are committed to building a world-class factory and becoming the most outstanding partner.

Product Description

Xin Aneng's wing pulley has been the industry benchmark in the field of heavy-duty material handling with its patented wheel seal structure, which includes Xin Aneng's continuous pursuit and exploration of excellent quality for more than 30 years. Wing Pulley uses computer analysis technology to ensure stability under extreme conditions, and the continuous operation life exceeds 10,000 hours, reflecting Xin Aneng's core strength as a manufacturing company in China.

Xin Aneng has been committed to technology research and development for more than 30 years. Wing Pulley has developed a triple cushioning design, which is an innovative development in the industry, which can effectively alleviate the lateral impact caused by belt misalignment. At the same time, Xin Aneng also has high-precision CNC machine tools, and the grooved surface can effectively reduce the coefficient of friction, and the impact resistance of alloy steel is improved compared with conventional products. Xin Aneng is also equipped with a 3D laser scanning inspection system to control the concentricity error of the product.

We know that your company has a wide range of application scenarios, and Xin Aneng can provide a full-scale wing pulley solution. No matter what kind of production scenario your company is, you only need to communicate with our engineers, and we will ensure that we can respond to your company in the first time and give you the most effective solution to meet your company's needs. Customer service is online 24 hours a day, and you can learn more by launching an inquiry.

Xin Aneng's factory in Hubei has a 24-hour continuous production capacity, with strong production capacity and abundant warehousing. If your company has urgent orders and needs, choosing Xin Aneng's wing pulley will be the best way to solve the problem. At the same time, Wing Pulley's Wing can be designed and customized into any shape your company wants, which meets your company's production needs.

Xin Aneng's wing pulley guarantees that your company will have no product problems for five years and provides quality assurance solutions. Let your choice be worry-free. If you have any questions, you can send an inquiry to consult, Xin Aneng welcomes your questions. Production Equipment in Hubei Xin Aneng Conveyor Machinery Co., Ltd:
